Summary

Self-taught Web-Developer with over three years of experience excelling in making multiple portfolio. Adept at building strong customer relationships, driving brand loyalty, and increasing customer engagement.

As a versatile and skilled freelance developer, I bring a solid background with 1 year of experience as a front-end developer, 6 months as a Django developer, and 6 months as a Dotnet developer. I have successfully contributed to a diverse range of projects, including the development of a key feature in a Django-based Portal project, as well as creating an inventory software and ecommerce using Dotnet. My commitment to delivering high-quality solutions aligns with my passion for technology and continuous learning.

Skills:

.NET framework, django, Social Media Management, Wordpress - Elementor

Projects:

1) **Event Management feature for IEEE NSU Student Branch (INSB): 25th Nov 2023 - 10th January 2024**
   - Created a Event Management feature for INSB where all the 9 teams of INSB can create, edit and update and notify a individual-teams events.
   - All Nine Teams private events is managed and notified to the individual team member privately. Only limited info is shown to the Guest Speaker of a seminar or a instructor of a workshop which can be controlled by the Team-Organizer
   - Each Team can arranges an event for all the Teams of INSB and also outside INSB members.
   - The features was made with Django app by a 7 members of new INSB web team within 4 weeks (including django training period) and later merged with the Main INSB Portal by Project Manager. Out of 7 member, 5 members where new in Django framework.

2) **Gorukhashi - ECommerce Website: June 2023**
   - Essential ecommerce functionalities consist of Product Catalog, Product Search and Filters, Product Details, Shopping Cart, Checkout Process, and User Accounts catering to administrators, employees, and customers alike. Additional features comprise Customer Reviews and Ratings, Inventory Management tailored for both administrators and employees as well as Analytics and Reporting functionalities designed specifically for admin

- The Project was made with dotnet. As a first time dotnet developer client-project, it was a great opportunity to learn how to make a real world project and also in a team.
- The implementation of these standard e-commerce features was executed using the .NET framework. As a .NET developer intern, providing a unique opportunity for hands-on learning within a collaborative team setting in a real-world application.

Experience:
- Making Gorukhashi Ecommerce using dotnet
- Made Company Portfolio WebSite in 2021 - 2022
- Overseeing the F-Commerce and WordPress-Elementor Computer Retail Business at Linnus Technology from 2019 to 2021.
